Thank you Steve - I have two questions about the predesign work plans specified in the OU3 ROD (noted in the fact-sheet in the 4th full paragraph under 'Cleanup Approach and Progress'.)

EPA: 1. The fact-sheet says that there are five predesign workplans, but only four topics are listed. I think the removal of PCB-contaminated soil on people's lawns was one of them?

DEC: Two of the work plans were combines as they both mainly involve the ballfield area, namely: The PCB delineation work plan and the Rag Pit Source Area for VOCs.

EPA2. Pete wanted to know what the general timeframe is for completing the PCB work (at both the homes and the ballfield).

DEC: There is an overall general schedule for implementing the five predesign work plans for OU3 that is in the work plan I sent you. The Start date is June first, 2014 based on the execution date of the order on consent. The final remediation schedules have yet to be reviewed/approved.

Thanks so much for your help on the fact-sheets these past few days,
-Carol-

Please contact me direct if I can be of further assistance.

Steve

Carol,

Attached is the draft revised RCRA Fact Sheet for Grumman-Navy as per our discussions. Please call me direct if you have any questions.

Thanks,

Steve
